FIELDWORK EXPERIENCE

- 2007–2010 *Social and Cultural Context of Racial Inequalities in Health*, Tallahassee, FL
Initiated community-based participatory research project on the health effects of racism and other social stressors among African Americans in Tallahassee. The three-year project, funded by the National Science Foundation, integrates participant observation, semistructured and structured ethnographic interviewing, social network analysis, and an epidemiologic survey.
- 2007, 2009 *Tsimane' Amazonian Panel Study*, Beni, Bolivia
Conducted short-term pilot field work as part of Tsimane' Amazonian Panel Study (TAPS), in conjunction with summer field school. The broad aim of TAPS is to examine the consequences of market exposure for natural resource use, health, and well-being of Tsimane' Amerindians in the Bolivian Amazon. My contribution to the project focuses on the health consequences of the stress process related to integration to the market and culture change.

- 2002–2003 *Social and Physical Environments and Health Disparities*, Detroit, MI
Designed geographic information system (GIS) and implemented observational instrument with handheld computers to assess aspects of the physical and social environment related to ethnic and socioeconomic disparities in cardiovascular disease. Amy J. Schulz, Ph.D., Dept. of Health Behavior and Health Education, University of Michigan School of Public Health.
- 2000–2002 *Skin Color, Culture, and Blood Pressure*, Guayama, Puerto Rico
Integrated qualitative and quantitative ethnographic methods with epidemiologic and biological techniques over a year's independent fieldwork. Developed a novel strategy for isolating cultural and biological dimensions of skin color and testing relationships with blood pressure in Puerto Ricans of mixed African ancestry.
- 1997–1998 *East Gainesville Community Health Assessment*, Gainesville, FL
Participated in interdisciplinary health assessment of underserved population targeted for new community health center. Assisted in survey sampling procedure and designed and conducted structured ethnographic interviews, focus groups, and semistructured key informant interviews. Leslie L. Clark, Ph.D., Dept. of Health Policy and Epidemiology, and Leslie Sue Lieberman, Ph.D., Dept. of Anthropology, University of Florida.
- 1996–1997 *Ethnicity and National Identity in Germany*, Köln, Germany
Conducted eight months of fieldwork using participant observation, unstructured and semistructured ethnographic interviews, and systematic methods of cultural domain analysis.

COURSES TAUGHT
